Project Management Tool

Click up-

The intern working today was pretty slow about sending the verification codes. Other than that, one con, Click Up is a super visual PM that is based off of Monday.com. It will allow us to communicate effectively. It will keep collaboration efficient because we can assign tasks to one or multiple people.

Requirements –

Beautiful Web page

(A simple, navigable website for users)

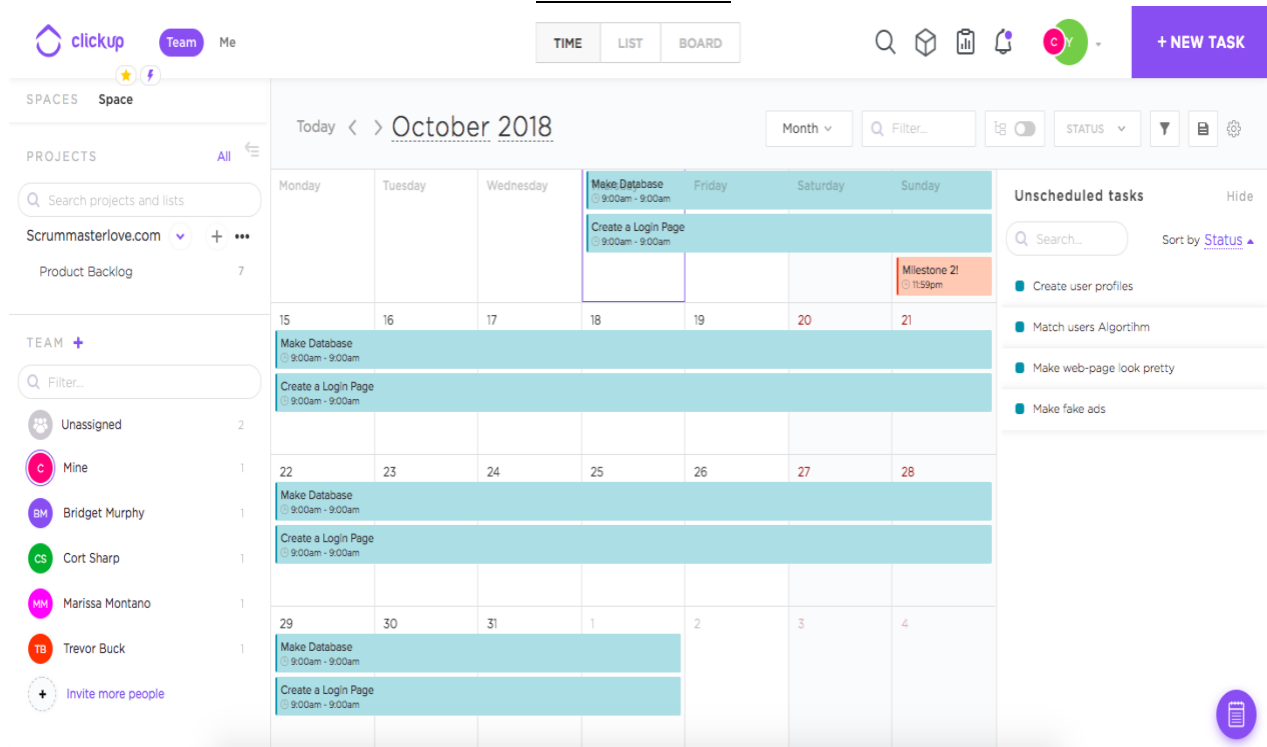

Log in

(Users should have a profile that they are able to log in under)

	<p>Algorithm to match users (Users should get matched based on the syntax of their sentences or simple likes and dislikes)</p> <p>User profiles (Users should have a profile that consists of likes and dislikes when they set up their account. This will help match them to other scrum masters)</p> <p>Sprints: 4 – 2 week sprints</p> <p>Create a login page (1 week) Create user profiles (2 weeks) Make database (2 weeks) Match users algorithm (1 week) Make web page look pretty (1 week)</p>
Plan Cycle within the Project Management Method	Created and documented a three-week sprint in our project management tool. Created tasks for the feature development planned in this sprint. Discussed with the team and we all took ownership of tasks and assigned due dates for each of the tasks in the sprint.
Agile Methodology	<p>Standup</p> <p>-----</p> <p>Went well-</p> <p>Goals were clearly set Stayed on task Kept to 5 minutes Everybody stood ups</p> <p>Didn't go well-</p> <p>Discussion was poor because no previous work was assigned</p> <p>Improvements-</p> <p>Standing desks Exercise ball chairs for the irony</p> <hr/>

	<div>Sprint retro</div> <div>Went well-</div> <div>Accomplished Milestone 1 & 2</div> <div>Set clear goals</div> <div>Didn't go well-</div> <div>Communication</div> <div>Improvements-</div> <div>Time management</div> <div>Reassign tasks based on capabilities</div>
